

Self Tipping Bin With Pour Edge STWB

These waste bins are self-tipping bins suitable for all waste handling applications. Used with either a forklift in manufacturing and industry or a crane in construction, these bins make light work of removing and tipping waste product.

Supplied with four crane lifting lugs and upending lugs underneath. It is also fitted with a drain plug and wheel brackets (wheels are optional extras). The waste bins are stackable to use minimal space for storage and transport. Comes in a galvanized finish.

Forklift application – operator hooks feet of bin over the lip of the waste bin and reverses slowly while lifting for the bin to tip.

Features

- > Working Load Limit (WLL) 1500kg
- > Options Available: – Rubber HD Castors
