

## STEEL GANTRY CRANE - 1500KG (BALKEN)

**SKU: SGC150**

These steel portable gantry crane systems are very effective and versatile units. A mobile lifting device that has the ability to handle a variety of loads in the workshop or factory environment. Being adjustable to varying heights and on castors makes this unit an essential piece of equipment for safe & effective lifting requirements.

The benefits of portable gantry cranes are clearly apparent in their ability to be rolled into position and set up for all types of material and equipment handling.

**NOTE:** Photo shows the steel portable gantry crane fitted with optional chain hoist and trolley. These are listed separately in the "Hoists & Winches" section of the catalogue
