

BEAK DRUM HANDLERS

PLASTIC & STEEL

This is our most popular drum lifter due to its ease of use, no manual connections required. The height of the beak allows the operator to continually observe the drum being handled. The unique beak design provides a high clamping force which allows most plastic drums with a top lip to be clamped. A heavier drum only increases the clamping force so its even more effective than a spade drum lifter when travelling over uneven ground. The double drum lifter (FDH-18-507) has been designed to lift 2 drums side by side, the single drum lifter (FDH-18-506) has been designed to lift one drum. This lifter is suitable for standard 205 litre plastic or steel drums with ribs. Finished in a galvanised coating for outdoor use. Supplied with certification plates and a safety chain. Instruction manual and certification included.

Product Code	SWL (kg)	Pocket Size (mm)	Pocket Centre (mm)	Load Centre (mm)	Horizontal C of G	Vertical C of G	Unit Weight (kg)
FDH 18-506	1000	185 x 60	250	1210	560	130	72
FDH 18-507	1500	185 x 60	600	1250	580	175	95

SMALL BEAK DRUM HANDLER

PLASTIC & STEEL

With the lifting of smaller drums becoming an issue, the beak drum lifter has been designed with the 20 litre drums considered. Supplied with certification plates, manual & certificate.

Product Code	SWL (kg)	Pocket Size (mm)	Pocket Centre (mm)	Load Centre (mm)	Horizontal C of G	Vertical C of G	Unit Weight (kg)
FDH-18-505	750	185 x 60	550	1210	560	130	70
