

## TECHNICAL DATA SHEET

### MAGNETIC RUBBER FORK PROTECTORS (PAIR)

FP-02-115

### DESCRIPTION

The Magnetic Fork Protector is an easily applied fork protector manufactured from rubber with a magnetic backing.

The protectors will increase the safety of your operations, by preventing slipping of loads and protect the load from scratches and markings.

### FEATURES

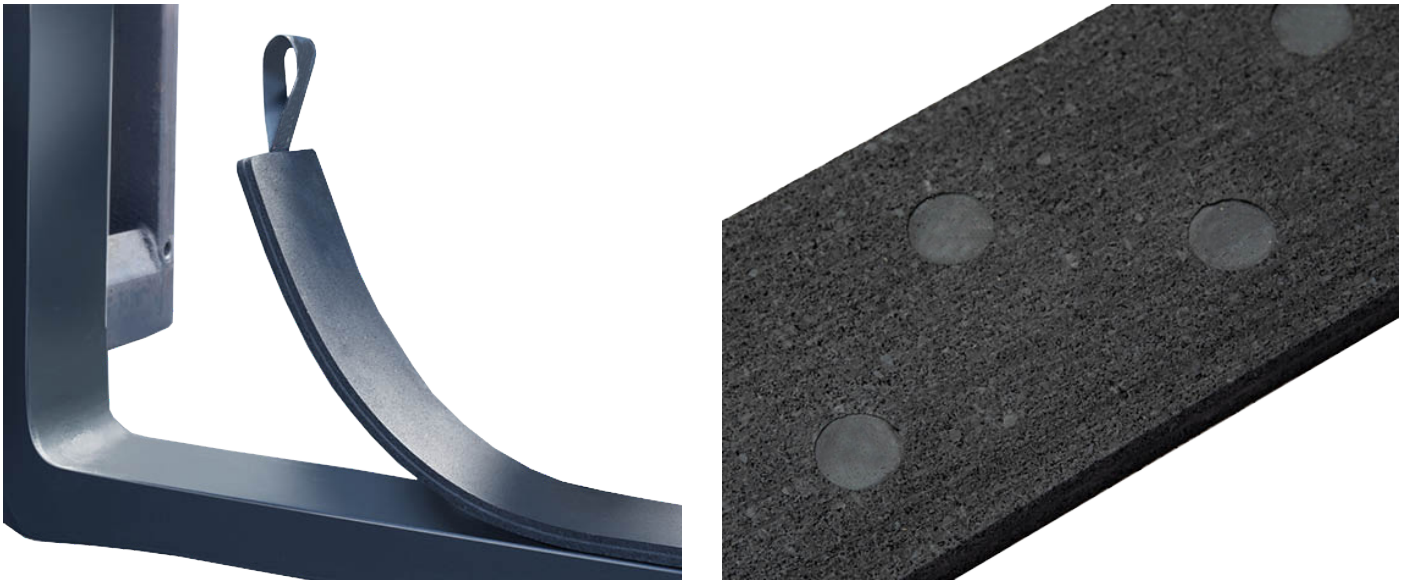

- ⊣ Higher occupational safety: minimized risk of slipping loads
- ⊣ Reduction of damages and protection of sensitive surfaces
- ⊣ Less vibrations
- ⊣ Noise reduction, especially when transporting metal components
- ⊣ Easily placed and removed within a few seconds
- ⊣ Magnetic adhesion on the forks
- ⊣ Abrasion and cut resistance for a long operating life
- ⊣ Also suitable for pallet trucks
- ⊣ Easy attachment on the lift truck (e.g. side on the mast) when not in use
- ⊣ For temporary use (Easy to fit and remove)

# TECHNICAL DATA SHEET

MAGNETIC RUBBER FORK PROTECTORS (PAIR)

FP-02-115

## SPECIFICATIONS

PRODUCT CODE	WIDTH	LENGTH	THICKNESS
FP-02-115	115mm	1150mm	10mm

### FLEXIBLE LENGTH ADJUSTMENT

Please select a length that is either a minimum of 50 mm shorter or 150 mm longer than the nominal length of the fork. PLEASE NOTE: Do not shorten the magnetic anti-slip layers, just continue the protruding length on to the back of the fork.
