

TECHNICAL DATA SHEET

PIPE HOOK - 2500KG CAPACITY

CHA-21-410

DESCRIPTION

The Concrete Pipe Hook is purpose-built for the safe, efficient handling of precast concrete pipes and similar cylindrical products. Designed for use with an overhead crane, this lifter makes the process of lifting, transporting, and positioning pipe sections faster and safer—minimising manual effort and reducing the risk of damage.

FEATURES

- Designed for concrete pipes – handles sections up to 2450 mm long.
- Balanced lifting – adjustable ring maintains load stability
- Pipe protection – fitted rubber pads prevent surface damage.
- Heavy-duty build – zinc-plated finish for durability and corrosion resistance.
- Efficient handling – ideal for manufacturers, contractors, and infrastructure projects.
