INDUSTRIAL LIFTING & HOISTING SOLUTIONS

NZ's #1 Lifting Equipment supply and service partner delivering safer and more productive workplaces.

TECHNICAL DATA SHEET

JIB (BATTERY REMOVAL) - 2000KG

FJA-19-207

DESCRIPTION

The 2000 kg Battery Removal Jib is purpose-built for safe and efficient removal or replacement of battery packs in electric forklifts. Now featuring a top-mounted lifting point, it can be used with both cranes and forklifts, offering greater versatility in workshop or warehouse environments.

Supplied with multiple lift points and four slings with swivel hooks for 2- or 4-point lifting, this robust unit is finished in hot-dip galvanised steel for lasting durability and corrosion protection. Each jib comes complete with a manual, certification, ID plates, safety chain, and swivel hook, ready for immediate use.

FEATURES

- Load Centre: 654mm
- Horizontal Centre of Gravity: 616mm
- Vertical Centre of Gravity: 43mm
- Converts forklift to a mobile crane in seconds without tools.
- Manufactured strictly in accordance with AS 2359.1

09 263 7725 (Auckland)
03 222 2836 (Christchurch)
